PREFACE

DONIPHAN COUNTY CEMETERIES

Doniphan County, the most northeasterly county of Kansas contains more than 110 cemeteries and burial sites. Many of these are lost forever as they are not marked or have been destroyed by time, nature and worst of all--man.

Doniphan county terrain is hilly with many sections hardly reachable except by foot. Snakes are plentiful and many areas it is not advisable to search except during the winter months.

Many burial sites are or were located to the northeast of the Fanning Area. This is very rough and difficult to search area.

Mr. Francis Burbridge of Troy, Kansas has done much work in locating the old burial places in the county.

This book does not include the Troy Cemetery.

A number of stones in the cemetery can't be read as too worn or broken. Some embedded in the ground.

ST. BENEDICT'S CEMETERY

Located two miles east and one half mile south of Denton.

NOTICE TO READERS:

All care has been taken in preparation of this book. Care has been taken to prevent errors but undoubtedly there will be some found. Spellings will be different from the one perhaps that is used today. Often different spellings were found on stones of the same family in same burial plots. Names were copied as found on the stones. Some were almost impossible to read because of weathering and/or vandalizing of stones.

Some you will find in order and in other cases they are placed in groups by family names. Small cemeteries and burial sites they generally will be listed in book as they were found in the cemetery.

If you do not locate the name or names you are searching for in the index, look through the book. It is very easy to overlook a name while indexing.

The best possible effort was taken to read the old stones as correctly as possible. If at all possible all information was taken from the stones. Old newspapers were used to provide additional information on the old burial sites and abandoned cemeteries when that information could be found.

*[Faint, illegible text, likely bleed-through from the reverse side of the page.]*

READERS:

If you do not locate the name you are looking for, look for it in the cemetery listings. Care has been taken to list all names but overlooking a name will happen regardless.

As you will note, many names are spelled several different ways. They are copied as they were on stones. Often spelled two different ways on same stone. Names were not changed regardless of how spelled on stones. Often stones were difficult to read in older portions of the cemeteries.
